

CMP MASTER PLAN UPDATE 2020

This is an updated assessment of where the City stands regarding the 2005 Comprehensive Master Plan Recommendations.

The table on page 44, indicates the % of the recommendations made in the 2005 Master Plan that have been completed (30%) those Partially Done (22%) and almost half (48%) left to be done.

This study does not change anything in the Master Plan but updates what has been accomplished. This is a Long Term Plan and much work is left to be completed.

Additional comments and some 2020 Survey Results are attached.

Planning & Zoning Commission approved the update as submitted by Martha Gosnell in the October 5, 2020 P&Z Meeting.
