

URGENT UPDATE:

Our city water supplier has announced a WATER EMERGENCY that affects the City of Blanco.

According to their alert:

“Until further notice, water consumption is limited to Indoor Use Only for Residents. Residential, commercial, wholesale, and industrial customers should NOT engage in landscape irrigation until further notice. Bulk Water Haulers are prohibited from pulling water from hydrants until further notice.”

Folks, this drought has hit everyone hard. The river and lake levels are very low. Our recent rains barely made an impact.

We are all in this together. Please follow these restrictions so we can get through this dry spell without having to take more drastic measures.

We are on top of this and will update you once these restrictions are lifted.
